Produce

We implement our strategy and manage the production process.

03.

Delivery

We will make sure the product is delivered according to desired timeframes.

04.

After Sales

We offer after sales, advice, care and support.

MALTON

Malton Range

—

This designer range is ideal for those looking to renovate one room at a time and not wanting to incur extra plumbing charges. The range is based upon the most popular sizes of radiators in the UK market and is designed to reduce the need for moving pipes etc.

Colours can be individually chosen from our lovely 12 finishes.

YORK

York Range

York 3- Column radiators will offer a higher heat output compared to a 2-column radiator of the same height and width.

While they come complete with modern and stylish features, they are based on traditional column radiator designs.

They look amazing in all areas of the house where high heat is required such as in living rooms, hallways, bedrooms and conservatories.

Colours can be individually chosen from our lovely 12 finishes.

A wide variety from Double and Triple horizontal sizes are available to choose from that will accommodate any household.

YORK

MINSTER

Minster

Minster Vertical Column radiators are ideal for heating large rooms. Their narrow aspect allows you to fit them in rooms where you may want to free up wall space.

While they come complete with modern and stylish features they are based on traditional column radiator designs.

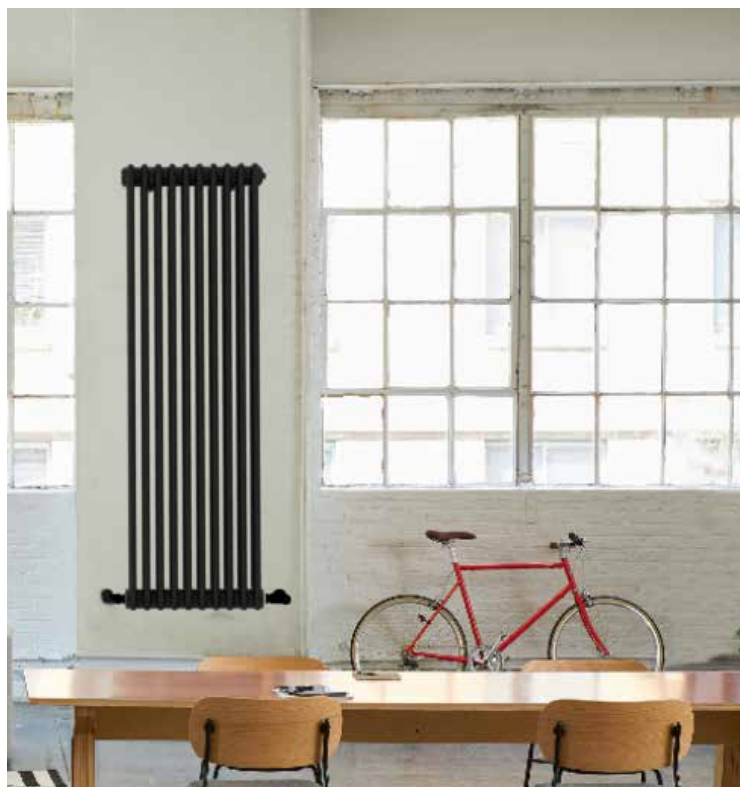

They look amazing in all areas of the house where high heat is required such as in living rooms, hallways, bedrooms and conservatories.

Colours can be individually chosen from our lovely 12 finishes. A wide variety from Double and Triple vertical sizes are available.

HARROGATE

Harrogate Range

We respect tradition, that's why we've created a radiator which combines style and function with a luxury finish. The range includes Victorian towel radiators that work with more traditional decor. Ideal for smaller or larger bathrooms, they keep towels warm and dry and ensure that heat is evenly dispersed through the space.

Traditional Triple Bathroom Radiators

Accessories

VALVES

You need radiator valves to control the flow of hot water around your heating system. They are placed on all radiators attached to your hot water flow, so you can set different room temperatures around your home. We offer a variety of different bespoke Valves to choose from. Some pipes come from the floor and others from the wall.

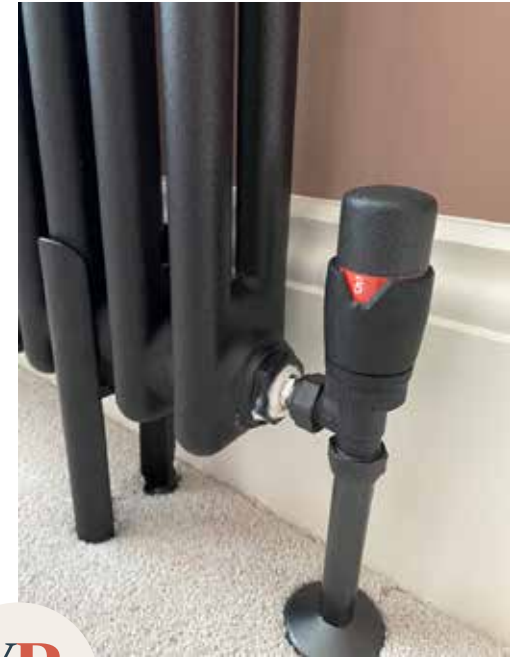

Each Project is unique and different and we can offer the best finishes for all your needs.

PIPE COVERS/SLEEVES

Pipe Covers, cover up the copper pipes that connect to your radiator. Our Matching Pipe sleeves (or covers) simply slot over your copper pipe-work and gives a beautiful feeling of completeness to any radiator installation.

RADIATOR FEET

Radiator feet are a sturdy and stylish. If your radiator sits on the floor, radiator feet will lift your radiator up off the floor, whilst offering additional support, especially for homes that don't have strong inside walls or if you just want the radiator to remain safely in place.
